

The mobile health global market report 2013 – 2017 (Vol.3)

The commercialization of the mHealth
applications

Graphical package

March 2013

The mHealth app market has entered the commercialization phase

- The market for mHealth applications has passed the initial trial phase and entered **the commercialization phase** of the market. This phase can be characterized by a massive increase of offered solutions, the creation of new business models and the concentration on private, health-interested people, patients and corporations as major target groups.
- **Missing regulations** is seen as one of the **major barriers** for the mHealth market to enter the next market phase: the integrated phase. In this phase, mHealth applications will become an integrated part of doctors' treatment plans and health insurers will become the main payer, especially for the more advanced mHealth solutions (2nd generation mHealth applications).
- Currently more than **97.000 mHealth applications** are listed on **62 full catalogue app stores**. The majority of these applications are general health and fitness apps that both facilitate the tracking of health parameters by private users, and provide users with basic health and fitness related information as well as guidance.
- The general **sophistication of today's mHealth applications is low to medium**, and many of the mHealth categorized applications provide a limited benefit for patients, doctors and health interested smartphone users. Nevertheless, advanced solutions do exist. Twenty such solutions are described and examined in the PDF report.
- Successful mHealth applications have managed to **generate millions of free and hundred thousands of paid downloads**. There are significant differences in download numbers between countries (US, UK, Germany, Japan and Brazil are analyzed in the report), platforms (Android and Apple) and devices (smartphones and tablets).
- The mHealth market will develop in line with the smartphone application market, but there are 10 specific market drivers that will shape the market during the commercialization phase.
- This is the **graphical package of the "mHealth App Market Report 2013-2017"**. It aggregates all graphics and tables that are being used in the report.

The mHealth app market package contains all graphics and tables of the „mHealth App Market Report 2013-2017“

Chapters

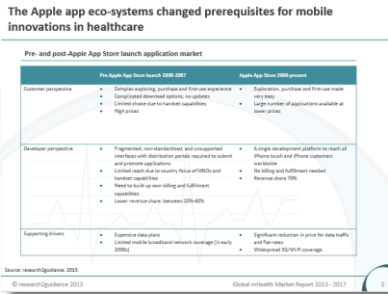

1. The evolution of the mHealth market
2. The smartphone application market phenomena
3. Status of mHealth application market
4. mHealth application categories
5. The mHealth market trends and drivers
6. The size of the mHealth market 2010-2017

Format:

- Content is displayed in graphics and tables
- PowerPoint and PDF
- PowerPoint charts can be dragged and dropped into your presentation
- 75 pages, 66 content pages

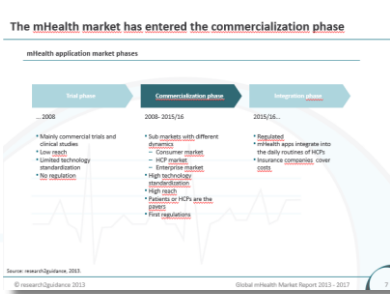

We use 4 different chart types to illustrate the facts and trends of the mHealth app market

Tables

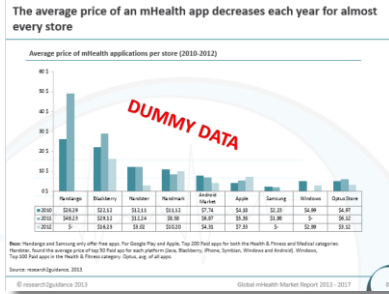

- **8 tables**
- Used for illustrating mHealth app store categories major market changes etc.

Conceptual charts

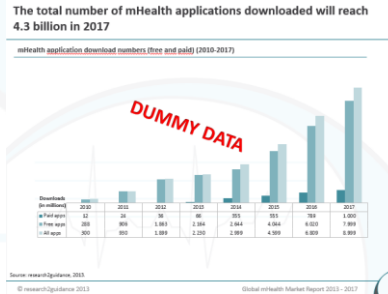

- **4 charts**
- Used for structuring the main market phases, business models etc.

Diagramms

- **30 diagrams**
- Used for displaying app numbers, survey results etc.

Trend charts

- **24 charts**
- Charts show mHealth app numbers, market revenue, downloads etc. over the time frame of 2010 - 2017.

List of figures (1/2)

- Figure 1: Healthcare expenditure as a percentage of GDP (1980-2009)
- Figure 2: iPhone shipments before and after the App Store launch (in millions)
- Figure 3: mHealth application market phases
- Figure 4: Mobile network download and upload speed comparison
- Figure 5: Number of applications published in marketplaces (2007 – 2012 Q3)
- Figure 6: Number of applications per platform (2008 Q4 – 2012 Q3)
- Figure 7: Number of new applications added to major app stores per quarter (2009 Q1 – 2012 Q3)
- Figure 8: New app stores launches (2000 – 2012 Q3)
- Figure 9: Number of smartphone application stores (2007 – 2012 Q3)
- Figure 10: Smartphone share of global mobile device shipments (2007 Q1 – 2012 Q3)
- Figure 11: Smartphone operating systems' market share by shipments (2009 Q2 – 2012 Q3)
- Figure 12: Average displayed paid application price in official OEM & OS app stores (2010 Q1 – 2012 Q3)
- Figure 13: App store share of total application downloads per period (2008 – 2012 Q3)
- Figure 14: Average total daily downloads per app store (in millions) (2009 Q4 – 2012 Q3)
- Figure 15: Paid smartphone application download revenue (in million USD) (2007 – 2012 Q3)
- Figure 16: Growth of mHealth apps between 2010 and 2012
- Figure 17: Share of mHealth apps and mHealth as a category (2010-2012)
- Figure 18: Number of mHealth apps in stores and share of total apps (Q2 2012)
- Figure 19: mHealth application category share (Q2 2012)
- Figure 20: Distribution of mHealth applications in terms of operating systems (2010-2012)
- Figure 21: Comparison of free and paid mHealth apps between (2010-2012)
- Figure 22: Number of mHealth applications per platform (Q2 2012)
- Figure 23: Average price of mHealth applications per store (2010-2012)
- Figure 24: Average price of mHealth apps (2010-2012)
- Figure 25: Average price of mHealth apps per category (Q2 2012)
- Figure 26: Cumulated downloads of the top 10 free and paid Apple Health & Fitness apps
- Figure 27: Cumulated downloads of the top 10 free and paid Apple Medical apps
- Figure 28: Cumulated downloads of the top 10 free and paid Android Health & Fitness apps
- Figure 29: Cumulated downloads of the top 10 free and paid Android Medical apps
- Figure 30: Business potential of different therapeutic areas (2010-2012)

List of figures (2/2)

- Figure 31: mHealth solutions that offer the biggest market potential for patients (2010-2012)
- Figure 32: mHealth solutions that offer the biggest market potential for professionals (2010-2012)
- Figure 33: Devices that offer the best business opportunities for mHealth today (2010-2012)
- Figure 34: Devices that offer the best business opportunities for mHealth in five years' time
- Figure 35: Smartphone platforms that offer the best business opportunities for mHealth as of today (2010-2012)
- Figure 36: Smartphone platforms that offer best business opportunities for mHealth in 5 years' time
- Figure 37: Main target groups of patient today (2010-2012)
- Figure 38: Main target groups of patients in 5 years
- Figure 39: Main professional target groups of today (2010-2012)
- Figure 40: Main professional target groups in the next 5 years
- Figure 41: Distribution channels that offer the best business opportunities for mHealth today (2010-2012)
- Figure 42: Distribution channels that offer the best business opportunities for mHealth solutions in 5 years' time
- Figure 43: Percentage of medical professionals and patients in developed countries (2010-2012)
- Figure 44: Hypotheses about the future of the mobile health industry (2010-2012)
- Figure 45: Main driving forces for the growth of mHealth in upcoming years
- Figure 46: Devices offer the best market potential for the use-functions listed
- Figure 47: Biggest barriers of mHealth in the upcoming years
- Figure 48: Best distribution channels for mHealth solutions as of today and in 5 years time
- Figure 49: Smartphone penetration vs. private health expenditure per capita (2012)
- Figure 50: Business potential for mHealth applications by disease
- Figure 51: Major developments in mHealth business models during trail and commercialization phase
- Figure 52: mHealth application download numbers (free and paid) (2010-2017)
- Figure 53: Average downloads of mHealth applications from mHealth users per year (2012-2017)
- Figure 54: Installed base of smartphone and mHealth users (2010-2017)
- Figure 55: Number of mHealth services subscribers by service type (2010-2017)
- Figure 56: mHealth market size by revenue type (2010-2017)
- Figure 57: Shipments of mHealth sensors and devices (in million units) (2010-2017)
- Figure 58: mHealth market opportunity by cumulated revenue type (2017)

List of tables

- Table 1: Pre- and post-Apple App Store launch application market
- Table 2: Characteristics of the trail phase
- Table 3: Characteristics of the commercialization phase
- Table 4: Characteristics of the integration phase
- Table 5: Potential use cases of smartphone features in mHealth (1/2)
- Table 6: Potential use cases of smartphone features in mHealth (2/2)
- Table 7: mHealth applications categories
- Table 8: European examples of traditional mHealth business models
